The Warranty Group relocates to the Loop

CHICAGO, Illinois – The Warranty Group today completed the relocation of over 500 employees to their new global headquarters at the historic 175 West Jackson Building, in the heart of Chicago’s financial district.

Three hundred employees from the 5050 N. Broadway Customer Service Center will occupy the 12th floor, joining two hundred employees occupying the 11th floor, relocated from Glenview in February.

The Warranty Group chose the new location because of its desirable mass transit options, the newly renovated Class A facility and the ability to combine their entire Chicago operations into one facility.

“We are thrilled to be in the heart of Chicago. Our new location is advantageous for our clients and our employees and gives us a leg up on recruiting the best talent in the business. The energy of the downtown area suits the spirit and vitality of our new company,” said David Cole, Chairman and CEO of The Warranty Group.

The Warranty Group is one of many recent high-profile migrations to downtown Chicago.

About The Warranty Group
